No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1985 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 29

Number 1, January 1985

CARL A. GORESKY. The Landis Award Lecture for 1982. Biological Barriers: Their Effects on Cellular Entry and Metabolism *in Vivo* 1

F. Y. ZHUANG, M. R. T. YEN, Y. C. FUNG, AND S. S. SOBIN. How Many Pulmonary Alveoli Are Supplied by a Single Arteriole and Drained by a Single Venule? 18

EUGENE M. RENKIN. Flow and Distribution of India Ink in Microvessels of the Frog 32

R. M. EFFROS, G. R. MASON, E. REID, L. GRAHAM, AND P. SILVERMAN. Diffusion of Labeled Water and Lipophilic Solutes in the Lung 45

BRYAN G. MILLER, J. MARC OVERHAGE, H. GLENN BOHLEN, AND ANDREW P. EVAN. Hypertrophy of Arteriolar Smooth Muscle Cells in the Rat Small Intestine during Maturation 56

SADIS MATALON AND MICHAEL A. CESAR. Effects of 100% Oxygen Breathing on the Capillary Filtration Coefficient in Rabbit Lungs 70

JULIAN H. LOMBARD, JEFFREY L. CHENOWETH, AND WILLIAM J. STEKIEL. Nonneural Vascular Smooth Muscle Tone in Arterioles of the Hamster Cheek Pouch 81

BENGT RIPPE, MICHAEL A. PERRY, AND D. NEIL GRANGER. Permselectivity of the Peritoneal Membrane 89

BRUCE M. FENTON, RUSSELL T. CARR, AND GILES R. COKELET. Nonuniform Red Cell Distribution in 20 to 100 μm Bifurcations 103

ANNOUNCEMENT 127

Number 2, March 1985

SHU CHIEN. The Microcirculatory Society Eugene M. Landis Award Lecture. Role of Blood Cells in Microcirculatory Regulation 129

MELINDA S. KWONG AND EDMUND A. EGAN. Validation of [^{57}Co]Cyanocobalamin as an Extracellular Fluid Marker and Measurement of Albumin Exclusion from the Interstitium in the Rabbit 152

J. GRAYSON AND MEI LEVESON. Functional and Morphological Changes in the Microcirculation of the Dog following Acute Coronary Artery Ligation 161

HELGE WIIG AND GRO GADEHOLT. Interstitial Fluid Pressure and Hemodynamics in a Sarcoma Implanted in the Rat Tail 176

C. C. MICHEL AND MARY E. PHILLIPS. The Effects of Bovine Serum Albumin and a Form of Cationised Ferritin upon the Molecular Selectivity of the Walls of Single Frog Capillaries 190

Abstracts of Papers Presented at the American Microcirculatory Society Meeting 204

Number 3, May 1985

Per Sejrsen, William P. Paaske, and Ole Henriksen. Capillary Permeability of ^{131}I-Albumin in Skeletal Muscle 265

Harvey N. Mayrovitz and Ran Rubin. Leukocyte Distribution to Arteriolar Branches: Dependence on Microvascular Blood Flow 282

U. Nobis, A. R. Pries, G. R. Cokelet, and P. Gaehtgens. Radial Distribution of White Cells during Blood Flow in Small Tubes 295

Yves Boucher, Sylvie Roberge, and Paul-Emile Roy. Ultrastructural Comparative Study on Lymphatic Capillaries of the Subendocardium, Myocardium, and Subepicardium of the Heart Left Ventricle 305

Robert J. Roselli, Richard E. Parker, and Thomas R. Harris. Comparison between Pore Model Predictions and Sheep Lung Fluid and Protein Transport 320

J. J. Friedman. Hyperosmolality and Transcapillary Fluid and Protein Movement in Skeletal Muscle 340

Andreas Creutzig, Wolfgang Wrabetz, Manfred Lux, and Klaus Alexander. Muscle Tissue Oxygen Pressure in Patients with Arterial Occlusive Disease 350

Thomas L. Smith, Sherrie W. Osborne, and Phillip M. Hutchins. Long-Term Micro- and Macrocirculatory Measurements in Conscious Rats 360

T. W. Grunt, A. Lametschwandtner, and O. Staindl. The Vascular Pattern of Basal Cell Tumors: Light Microscopy and Scanning Electron Microscopic Study on Vascular Corrosion Casts 371

Bernard P. Fleming and Michael E. McKinney. Adrenergic Innervation in the Microcirculation of the Bat Wing 387

R. Auerbach, L. Alby, L. W. Morrissey, M. Tu, and J. Joseph. Expression of Organ-Specific Antigens on Capillary Endothelial Cells 401

Timothy K. Hart and Richard M. Pino. A Comparison of Two Catalase Preparations Used to Examine Vascular Permeability 412

Author Index for Volume 29 421

The Subject Index for Volume 29 will appear in the November 1985 issue as part of a cumulative index for the year 1985.

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215.** MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors,** and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for the printer. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5 × 11 inches, with coordinates properly labeled; grid lines that are to show in the engraving should be inked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unmounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5 × 8 in. (127 × 203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Color illustrations are acceptable, but at the author's expense. An excessive number of tables or illustrations may necessitate a charge to the author.

Footnotes. These should be designated in the *text* by superscript *numbers* and typed on a separate sheet; in the tables by superscript *letters* and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The *Handbook for Authors,* 1978, of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

SIMIONESCU, N., SIMIONESCU, M., AND PALADE, G. E. (1978). Structural basis of permeability in sequential segments of the microvasculature of the diaphragm: I. Bipolar microvascular fields. *Microvasc. Res.* **15,** 1–16.

BELAMARICH, F. A. (1976). Hemostasis in animals other than mammals: The role of cells. *In* "Progress in Hemostasis and Thrombosis" (T. Spaet, ed.), Vol. 3, pp. 191–220. Grune and Stratton, New York.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index*, 1980. Unpublished observations and personal communications should be cited in the *text* as such.

Reprints. Authors will receive 50 reprints at no charge. Additional copies may be ordered when galley proof is mailed.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.
